MASTIFF ASSOCIATION

Breed Championship Show

Saturday 20th February 2010

Judge: Mme Anne-Marie Class (France)

It is always a great pleasure and an honour to judge one's favourite breed in the country of origin.

As I have been involved in the breed for years and live at home with Mastiffs, I pay particular attention to soundness especially in movement and temperament. The mastiff is a dissuasive breed and must be confident, never aggressive. Soundness in movement and construction are essential when they get older. The breed standard is very clear concerning this topic.

I was really delighted by the quality of several dogs and bitches which were very well balanced. Movement was for the majority really correct despite some minor faults.

To say one word about my regrets, many eyes were not typical being too round which spoils the expression. On the other hand, they were generally clean. Many dogs have good depth of body and were well-balanced but could have slightly more size. However soundness is more essential than size.

I was not disappointed as the overall quality of the dogs was good which is more important for me than to find THE dog I was looking for.
